AB-38 HOME HARDENING, LOW-COST RETROFITS, AND DEFENSIBLE SPACE FORM

Subject Property Address / APN: 7230 LATIGO ST, ANGELS CAMP, CA 95222 / 052-011-002-000

NOTICE: If this home is located in a high or very high fire hazard severity zone and this home was built before the implementation of the Wildfire Urban Interface building codes which help to fire harden a home, in order to better protect your home from wildfire, you might need to consider improvements. Information on fire hardening, including current building standards and information on minimum annual vegetation management standards to protect homes from wildfires, can be obtained on the internet website <http://www.readyforwildfire.org>.

Fire Hazard Severity Zone Maps released by CAL FIRE can be viewed [here](#).

SELLER, DOES THIS FORM NEED TO BE COMPLETED?

If the Property is located in a HIGH or VERY HIGH Fire Hazard Severity Zone, has 1-4 units built before 2010, and if Seller is legally required to complete a Real Estate Transfer Disclosure Statement (TDS) pursuant to CIV §1102, then Seller must complete this form and comply with AB-38.

YES

NO

IF SELLER ANSWERED "YES":

- 1) An AB-38 disclosure form (like this one) must be completed by Seller and provided to Buyer.
- 2) A Defensible Space Inspection must be scheduled. An inspection with CAL FIRE can be scheduled [here](#).
- 3) A local vegetation management ordinance may detail if the Seller must provide defensible space compliance documentation before the close of escrow, or if the parties may agree in writing that compliance documentation can be obtained by Buyer after the close of escrow. Further clarity on local ordinances may be found in Section C below, or by emailing us at orders@propertyid.com.
- 4) Seller must give Buyer written notice and information on how to harden a home against fire, a list of features on the property that make the home vulnerable to wildfires and flying embers, and a list of low-cost retrofits that Seller completed while Seller owned the property - see Sections A & B below.

A. HOME HARDENING

FEATURES MAKING HOME VULNERABLE - IF THE PROPERTY IS IN A HIGH OR VERY HIGH FIRE HAZARD SEVERITY ZONE, SELLER MAKES THE FOLLOWING DISCLOSURES:

Pursuant to Civil Code § 1102.6f [Law section \(ca.gov\)](#): If Seller is aware of any of the following features that may make the home vulnerable to wildfire and flying embers, Seller will check all that apply:

1. ☐ Eave, soffit, and roof ventilation where the vents have openings in excess of one-eighth of an inch or are not flame and ember resistant.
2. ☐ Roof coverings made of untreated wood shingles or shakes.
3. ☐ Combustible landscaping or other materials within five feet of the home and under the footprint of any attached deck.
4. ☐ Single pane or non-tempered glass windows.
5. ☐ Loose or missing bird stopping or roof flashing.
6. ☐ Rain gutters without metal or noncombustible gutter covers.

If the property is not in either a high or very high fire hazard severity zone, but the property is in or near a mountainous area, forest-covered lands, brush-covered lands, grass-covered lands, or land that is covered with flammable material, Seller may choose to voluntarily make the disclosures in Section A above, even if not mandated by law, because the Buyer might consider the information material.

CONSTRUCTION COMPLETION - HOME FIRE HARDENING FINAL INSPECTION REPORT: ☐ If Seller has checked this box, Seller has completed construction and has obtained a final inspection report that covers compliance with defensible space
